SEMA 2023 EDITION

COMING

SOON!

Two new Hi-Lift® Jack mounts for the new Ford Bronco!

Conveniently mount and store your Hi-Lift® Jack on the tailgate or roll cage of a Ford Bronco. Mounts are constructed of 6061-T6 anodized and/or powder-coated structural aluminum for strength, durability, and a clean appearance.

Hi-Lift® Vertical Tailgate Mount for Ford Bronco

- Designed to fit all 2021-Present Ford Bronco vehicles. Installation is simple, and minimal drilling is required.

Hi-Lift® Roll-Cage Mount for Ford Bronco

- Fits all 4-door 2021-Present Ford Bronco vehicles. Installation is simple, and no drilling is required.

Hi-Lift® JACKS DON'T SETTLE FOR AN IMITATION – THE DIFFERENCE IS QUALITY

With over 100 years of manufacturing quality, the Hi-Lift® Jack is a rugged, highly versatile jack that puts you in command of situations requiring lifting, pushing, pulling, winching, and clamping. Although light in weight and easy to maneuver, the Hi-Lift® Jack offers a rated capacity of 4,660 lbs (2114 kg) and a tested capacity of 7,000 lbs (3175 kg).

Only Hi-Lift® Jacks are tested and certified to meet applicable requirements of ASME B30.1-2015 international standard. Hi-Lift® Jacks are made with a two-piece handle and socket design that is built for extended life. Cheaper imitations use a one-piece design that bends easily if lateral pressure is applied while lifting a load.

Our jacks are designed to help you survive in the most demanding situations – whether you are in the Moab desert canyons, the Welsh Mountains, the Amazon jungle, or the farmlands of Indiana. With a full-range of specially designed accessories, the Hi-Lift® jack is just about the most versatile piece of off-roading/farm/auto recovery/rescue equipment you can buy.

All-Cast Jack

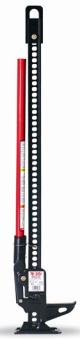

Hi-Lift® Jack Company offers the only all-cast jack manufactured in the world today. Our all-cast jack is manufactured from high yield and tensile strength iron castings, the same durable metal that we have used for over 100 years.

All-Cast Construction.
Available in 42", 48", & 60" Heights. (107, 122, & 152cm)

Cast/Steel Jack

The cast and steel jack is exactly the same as the all-cast jack except that it has four stamped high-strength steel parts. We stamp and form the parts in-house; that allows us to offer the jack at a lower price, yet we still maintain the rigid quality standards that every Hi-Lift product must meet.

Made of Cast & Stamped Steel Parts.
Available in 36", 42", 48", & 60" Heights. (91, 107, 122, & 152cm)

X-TREME Jack

The Hi-Lift® X-TREME is for the serious Hi-Lift® user, offering the "top of the line" all-cast version with a special top winch-clamp-spreader attachment that provides the ultimate in multi-use functionality. The X-TREME Top Clamp replaces the top clamp-clevis of the standard Hi-Lift® models and provides the ability to winch, clamp, and spread up to 5,000 lbs.

All-Cast Construction
Available in 48", & 60" Heights. (122, & 152cm)

UTV Jack

The "Original Power Tool" of the off-road market is available to meet the ever-increasing demands of the UTV market with this specialized Hi-Lift® jack model. Sized perfectly for UTV operators including off-roaders, farmers, ranchers, search and rescue personnel, and general outdoors enthusiasts.

Made of Cast & Stamped Steel Parts
Available in 36" & 42" Heights (91 & 107cm)
Includes winch/clamp/spreader tool found on Hi-Lift X-TREME

Patriot Edition Jack

The Hi-Lift® Patriot Edition Jack is constructed of cast iron components for ultimate strength and durability. A portion of the proceeds for every Hi-Lift® Patriot Edition Jack sold goes to Hope for the Warriors—a national nonprofit organization in the United States that provides assistance to combat wounded service members, their families, and families of those killed in action. The Hi-Lift® Patriot Edition Jack features a blue powder coated finish with zinc-plated hardware, white, powder coated two-piece handle and socket is durable and red Handle-Keeper.

All-Cast Construction
Available in 48", & 60" Heights (122, & 152cm)
Red Handle-Keeper (HK-R) Included

Equipment/Agriculture Jack

The Hi-Lift® Equipment/Agriculture Jack is constructed from high strength stamped steel and cast iron and incorporates a specially designed fitting, that attaches directly to a trailer tongue, allowing this jack to be used to support trailers and other equipment but also as a standard Hi-Lift® jack.

Made of Cast & Stamped Steel Parts
Specially designed fitting allows for direct attachment to trailer tongue

P.J. Harrah Signature Edition Jack

The Hi-Lift® P.J. Harrah Signature Edition Jack bears the signature of the founder of our company, and the inventor of the Automatic Combination Tool, the Handyman® Jack, and what is now widely known as the Hi-Lift® Jack. The Hi-Lift® P.J. Harrah Signature Edition Jack combines the old with the new. The aesthetics and unique features harken back to the original Automatic Combination Tool and Handyman® Jack invented by P.J. Harrah in 1905. Still, it's a true Hi-Lift® Jack, offering the latest and greatest in features, capacity, durability, and versatility that people have come to depend upon.

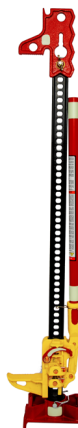

All-Cast Construction
Available in 48" & 60" Heights (122, & 152cm)
Unique vintage-style base and top-clamp

First Responder Jack

Firefighter-designed, the First Responder Jack is constructed of cast iron and high-strength aluminum. It offers up to 4660 lb. of leveraging, lifting, and winching options. No other rescue tool is as easy to use, dependable, visible, and versatile – giving it unlimited potential at a fraction of the cost of other expensive rescue tools. The First Responder Jack offers the same spreading and ramming options used in extrication as the expensive hydraulic tools, yet it requires no fuel or power, which makes it ideal for remote access with limited resources and USAR applications in all types of disasters.

Made of Cast & High-Strength Aluminum Parts
Available in 36", 48", and 60" Heights (91, 122, & 152 cm)
Includes winch/clamp/spreader tool found on Hi-Lift X-TREME
Also includes Aggressive 36 sq. inch Rotatable Base Provides for Use of Cribbing, Chains, and Straps

SEMA 2023 EDITION

NEW & IMPROVED

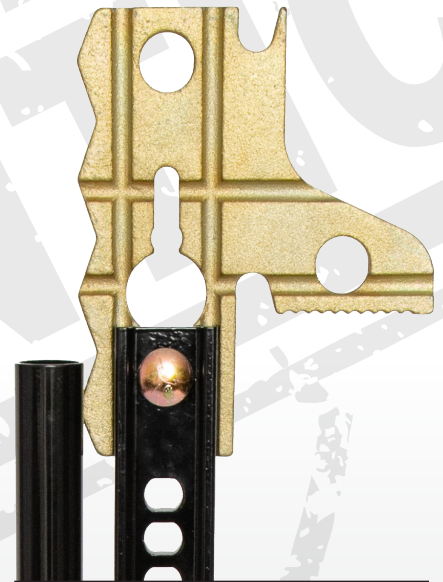

Winch-Clamp-Spreader Attachment (WCSA)

This month you will see a major upgrade/improvement to all Hi-Lift® X-TREME, UTV, and First Responder Jacks.

The unique Winch-Clamp-Spreader Attachment (WCSA) that comes standard with these jack models is taking on a new look that increases capabilities and performance for the ever-increasing use of soft shackles and synthetic rope. *The new WCSA will replace the old design as a “running change” as the old design is phased out.*

The upgraded Winch-Clamp-Spreader Attachment (WCSA) still offers the ability to winch, clamp, and spread to the full rated capacity of the Hi-Lift® Jack, and is still attachable to any point on the Hi-Lift® Jack steel standard bar. It comes with a 3/8” chain slot for easy/secure winching and quick slack adjustment, along with a 7/8” shackle hole for easy/secure, non-binding shackle attachment. And it still comes with a cut-out wedge for “gripping” when spreading.

Now the upgraded design allows easy/secure winching and quick slack adjustment of synthetic rope, along with a shackle hole that better accommodates soft shackles.

New Winch-Clamp-Spreader Attachment
